Founded in 1956 by Joseph R. Loring, an inventive young engineer with exacting standards, Loring Consulting Engineers is today a thriving multidisciplinary MEP, fire protection, telecommunications, commissioning and energy services firm. With more than 120 employees operating from five offices in the U.S. and Canada, we're delivering high performance building systems that meet the needs of clients across the country and around the globe.

For six decades, we've integrated smart building systems design and state-of-the-art services into nearly 10,000 projects in most every building category. Collaborating alongside leading architects, we've been entrusted to work on some of the outstanding buildings of our time, from the

original World Trade Center complex, the iconic Citicorp building, the Statue of Liberty, and the U.S. Supreme Court Building to the Parliament House of Australia and the new National Library of Latvia.

Finding innovative solutions that meet our clients' most complex challenges continues to be our hallmark. In 2016, Loring earned top awards for our role in achieving New Jersey's first net-zero school facility that also meets the Living Building Challenge.

Loring's mission today remains unchanged: bring the right technologies, impeccable quality, and adherence to schedule and budget to projects of every type—standards our founder Joe Loring would demand.
